## Count on your Innovation Partners at Tharseo IT, The Cloud Experts

Tharseo IT, with our in-house OCVS and OCI experts, is standing by to guide you on your journey to the cloud. We've been there and done that... again... and again.

Using our 5-step, SWIFT methodology for Cloud Migration, Tharseo IT will take the unknowns out of your cloud journey as you re-host, re-platform or re-factor your IT applications to OCI.

We're with you, every step of the way...

From initial Discovery to Go-Live, Tharseo IT will be a part of your team as you transform existing applications into “future-ready” and “future-proof.”

### *LaSalle University*

OCVS lift and shift for LaSalle University, transitioning their on-premises VMware environment into OCI. Our comprehensive approach included provisioning the OCI tenant, setting up the network, installing a FastConnect, and migrating their virtual machines (VMs). This strategic initiative optimized LaSalle University's IT infrastructure and streamlined their operational capabilities by leveraging cloud efficiencies.

### *Kalamazoo Valley Community College*

Move Oracle databases to Oracle Database Base Service, and VMotion all Banner and third-party applications on VMWare to Oracle Cloud VMWare Service (OCVS): Tharseo IT will do a complete migration of KVCCs Oracle Database along with Banner & 3rd party apps on VMWare to OCVS. We will migrate the OS to OCI along with Degree Works.

## Get to know Tharseo IT

We are minority-owned business headquartered in Washington, DC. We provide cloud-based software, scaled agile design, development, integration, data migration, delivery, 24/7 operational support, customer support, and training for Oracle Cloud VMWare Solutions and Oracle Cloud Infrastructure.

In addition to working with colleges/universities, we have assisted government agencies move workflows, applications, and data to secure cloud services, including having helped MD529, Marshall University, Butler CC, Emporia University, Alcorn State University, WV Tax, DC Health, MD529, and DC Water to move to the security and scalability of the cloud.
